Policy 703.4 (previously Policy 903.4)

Vandalism

The Board recognizes its responsibility to ensure an environment in which the property of the school district, its students, and its staff are safeguarded. To this end, the Board encourages district and school staff and students to participate jointly in a continuous programme for the prevention of vandalism.

Although the Board recognizes that damage to school property can occur under a variety of circumstances and at different times, the Board deplors any willful or negligent behaviour likely to result in damage to school property. The Board recommends appropriate action be taken to mitigate or prevent destruction or loss resulting from such behaviour, and to bring those responsible to account.

A reward may be offered by the Board for information leading to the apprehension of any person who willfully damages school district property.
