

EDUCATION: STUDENTS

Policy 502.1.2-R

Dress Code

In order to encourage and support a partnership with respect to encouraging appropriate dress, each school will develop a brief statement of purposes and practices consistent with the district dress code guidelines associated with these regulations.

The school dress code will state expectations for dress that apply to all members of the school community and the values and purposes that underlie those expectations.

The dress code will be developed and communicated in a way that promotes common understanding and commitment. Staff and parents will be involved in development of the school dress code. In secondary schools students will also be involved and in elementary schools students may be involved.

The school dress code will be reviewed annually through an inclusive process and communicated at least annually to staff, students, and parents.
