

EDUCATION: PROGRAMS

Policy 512.11 (previously 602.11)

Adult Education (Continuing Education)

The Board endorses the concept of continuing education. It supports and encourages the development of continuing education programmes which through the opportunity of life-long learning enables citizens to have access to education throughout their lives. Such learning may be to upgrade or learn new vocational skills, complete high school standing, or enhance their cultural knowledge and enjoyment and enrich their present lives.

The Board is authorized to arrange day and night school programmes which may include the same courses offered in regular schools, or courses in any other subjects deemed desirable by the Board and approved by the Ministry of Education. Students currently registered in the public schools must receive a letter of permission from the principal prior to registering in a high school credit course at night school.
