Disposal of School Board Land or Improvements

The Board believes that all decisions relating to disposition of School Board lands and improvements shall be made in the interests of effective stewardship of public assets and protection of the long-term interests of the School District.

The School District may dispose of property owned or administered by the Board including land and improvements, leases (short-term and long-term), rights of way and easements under the authority of the School Act. The authorization for disposal of land or improvements must include consideration of the future educational needs of the District, disposition through a public process, and Ministry approval where necessary. Disposition will be through a public process, and will typically be for fair market value.

Adopted: 11 December 2019
