Enrolment Projection - Methodology

- **Definition of Budget Assumptions:**
 - Best estimates of budget factors based on available information and extensive analysis at the time of budget development
- **Student Enrolment Projection – Planning Department:**
 - Hybrid model:
 - Uses school catchment based local knowledge on growth and demographics to develop school by school projection
 - Justified with a global cohort methodology based on district enrolment trends and demographic data
 - Global projection using the cohort methodology typically relies on a five-year average student retention rate, which is commonly used by metro school districts
 - Housing development and completion data in the City of Richmond
 - City Centre densification (localized surges), major network roads densification (localized impact) and neighborhood infill (slower impact)
 - Birth and age cohort data from Statistics Canada and BC Stats
 - Kindergarten children projection (age 5) estimates by the district and school catchment
 - Federal Government immigration policy shift – targeting nation-wide increase of 500k per year
 - Social, economic and political impacts on net in-migration and student population

Financial Policy Framework

Ministry K-12 Public School Financial Reporting Policy

- School Districts must follow the Public Sector Accounting Board (PSAB) Standards
- School Districts must follow the Budget Transparency and Accountability Act and associated supplementary regulations
- Ministry of Education and Child Care requires that boards of education prepare a balanced annual budget, engage in a long-term planning, mitigate financial risk and support consistent service to students
- A balanced annual budget means revenues plus appropriation of prior year accumulated surplus can fully fund:
 - Operating expenses
 - Tangible capital asset acquisition

Policy 631 and 631-R Accumulated Operating Surplus and Capital Reserves

- The Board is responsible for the financial health of the district and protecting the district from financial forecasting risk and unforeseen circumstances that would negatively impact the education of students
- Maintain long-term fiscal stability, manage financial risks and support the mandate of success for all students
- Create a contingency fund for unforeseen circumstances
- Budget for one-time and/or multi-year funding for student learning programs and unfunded capital projects
- Unrestricted accumulated operating surplus and local capital reserve balance: 2 to 4% of the district's annual operating budget
